**March 2020**

## About AIATSIS – [www.aiatsis.gov.au](http://www.aiatsis.gov.au)

The Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS) is the world's leading research, collecting and publishing organisation in Australian Indigenous studies. We are a network of council and committees, members, staff and other stakeholders working in partnership with Indigenous Australians to carry out activities that acknowledge, affirm and raise awareness of Australian Indigenous cultures and histories, in all their richness and diversity.

AIATSIS develops, maintains and preserves well documented archives and collections and by maximising access to these, particularly by Indigenous peoples, in keeping with appropriate cultural and ethical practices.

# AIATSIS Place Thesaurus

## Introduction

The AIATSIS thesauri have been made available to assist libraries, keeping places and Indigenous knowledge centres in indexing / cataloguing their collections using the most appropriate terms.

This is also in accord with Aboriginal and Torres Strait Islander Library and Information Research Network (ATSILIRN) Protocols –

<http://atsilirn.aiatsis.gov.au/protocols.php>

Protocol 4.1 states:

*“Develop, implement and use a national thesaurus for describing documentation relating to Aboriginal and Torres Strait Islander peoples and issues”*

We trust that the AIATSIS Thesauri will serve to assist in this task.

## About the thesaurus

The AIATSIS Place Thesaurus contains headings for place names, using the Indigenous place name first wherever possible. . These headings are used to describe all items held in Mura®, the AIATSIS Collections Catalogue – <http://mura.aiatsis.gov.au>

This PDF version of the AIATSIS Place Thesaurus will be updated every 6 months.

We welcome your comments on the AIATSIS thesauri. Send these comments to [library@aiatsis.gov.au](mailto:library@aiatsis.gov.au) including the heading from the thesaurus that you wish to provide comments on.

## Using the thesaurus

### Display formats

The thesaurus is in alphabetical order, with each entry displaying all related terms.

This will display the term followed by its relationships and will be followed by the next alphabetical entry with its relationships. The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

BT: Broader Term

NT: Narrower Term

UF: Use For

## Structure and display

### Hierarchical relationships

This structure is reflected in the thesaurus as a hierarchical structure.

The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

#### Example:

New South Wales (NSW)

NT: New South Wales North Coast (NSW N Coast SH56, SI56)

Then:

New South Wales North Coast (NSW N Coast SH56, SI56)

NT: Grafton map area (NSW N Coast SH56-06)

Then:

Grafton map area (NSW N Coast SH56-06)

NT: Baryulgil (NSW N Coast SH56-06)

## **Additions to headings**

The majority of headings in the AIATSIS place thesaurus and the AIATSIS language thesaurus contain map grid references. These grid references relate to the 1: 250 000 map sheet areas.

Examples: Dubbo (N NSW SI55-04)

You can search the Geoscience Australia web site, place names of Australia for place names which will take you to the appropriate map sheet

[www.ga.gov.au/map/names/](http://www.ga.gov.au/map/names/)
